... Experience the Control**

## Technology Associates International

We are passionate about Microsoft Office Project and the EPM solution. More importantly we are passionate about what Microsoft Office and the EPM, PPM and SharePoint Solutions can do for your business. We can help you to take control of your programmes, projects, resources and your time. We can establish confidence within your business and your management team to ensure that all of your programmes and projects are being dealt with in the most efficient and effective way possible. We have over seventeen years of experience in delivering innovative business solutions to our clients.

**Are YOU ready to take control ?**

### Training Solutions

We offer the most comprehensive selection of Microsoft Office Project training courses in the world. As well as providing a broad range of courses covering all levels of skill, many of our courses have been designed for specific industries.

Technology Associates provide courses that prepare delegates for the Microsoft Project Certification exams (including 70-281). Attendance on our courses can provide credits towards continuous professional development requirements. In many cases our courses also (uniquely) provide partial exemption from the new ITC2 Experience Certified Project Management Professional qualification (see [www.itc2.org](http://www.itc2.org)). We can now provide PRINCE2 Foundation and Practitioner training and examinations, including corporate tailored courses that combine the use of Microsoft Project with the PRINCE2 methodology.

#### Training Services:

- Comprehensive Microsoft Project, Project Server & Project Web Access Training
- Extensive Microsoft Office, SharePoint and related technology training
- All versions of Microsoft Project supported
- Web based modules or Hosted Training via Live Meeting

Technology Associates have helped some of the largest companies in the UK, Europe, AsiaPacific and the Americas to implement Project Management Solutions at the highest level. Take advantage of our expertise and services and streamline your use of Microsoft Project. We can implement a structured, methodical and consistent approach to Enterprise Project Management, giving you the benefit of a more efficient, cost effective and productive organisation with a measurable ROI.

“ Technology Associates were the first company to take the time to fully understand our needs. They were very professional and able to produce a detailed specification of a solution to meet our requirements. Even after our business model changed they were extremely accommodating in being able to modify the solution to fit. Technology Associates is one of the friendliest and most professional companies we have encountered and we shall definitely be using them again.”

Director, Global Development  
Major Defence Company

“ We are delighted to be able to recommend Technology Associates to other clients. They went the extra mile for us in delivering a solution with very complex requirements. They clearly demonstrated to us that they could provide a real return on investment for us within a very short period!”

IT Director  
Global Petrochemical Company

“ We chose Technology Associates for their ability in being able to demonstrate a deep understanding of Microsoft Project technology and how to convert our own requirements into a tangible solution that would benefit our business. They were very flexible and accommodating and we have been very impressed with their level of expertise, support and training.”

Programme Manager  
Global Pharmaceutical Company

## Development

We have designed and developed custom Microsoft Project solutions for many organisations worldwide. Our dedicated team of developers will assess your detailed requirements, establish a specification, and will deliver and implement a solution to an agreed budget and timescale.

We have implemented hundreds of solutions for clients over the years, including many for specific vertical markets such as Pharmaceutical, Healthcare, Financial Services, Defence, Automotive, Architectural, Construction, Engineering, IT and Manufacturing and many others. A well structured Microsoft Project Solution customised to your needs will provide major benefits to your organisation in terms of resource management, analysis, accurate reporting, project control, productivity and cost benefits.

## Products

Technology Associates International provides complete business solutions to its clients. Sometimes the scope of a customer's requirements means that the functionality of Microsoft Project alone may not be sufficient. In these circumstances Microsoft Project needs to be customised or extended through use of additional third party tools that integrate seamlessly with the application. Whatever your need we can help.

Technology Associates is Europe's largest distributor of third party products for Microsoft Project and we have established specific relationships with strategic partners to deliver additional consulting skills that support these products.

### Our range of products deliver enhanced functionality to Microsoft Project including:

- Time and expense recording
- Complex billing and costing
- Fully integrated PSA solutions
- Earned Value and Predictive performance measurement
- Issues, risk and document management
- Complex cost control and financial reporting
- Requirements capture and specification
- Graphical reporting tools
- Advanced warnings and alerts
- Automated notifications and workflow
- Business Process Management and workflow
- Advanced database interrogation and reporting
- Interfacing tools (data exchange)
- Exchange of project data with handheld devices
- Project viewers and add-in modules
- Enhanced leveling and resource management
- Office, Visio, InfoPath, Groove, Virtual Earth, MapPoint add-ins and solutions
- SharePoint Web Parts and custom template development
- Fully Hosted EPM, PPM And SharePoint Environments.

Whatever your needs, we will be able to deliver a comprehensive solution.

## Technology Associates International

Technology Associates International is an award winning consultancy which provides world class project management consulting services and productivity tools, as well as training and development services to a global client base. Our focus is on Microsoft Project based implementation and deployments which enable clients to realise a substantial ROI from Enterprise Project Management (EPM) and collaborative SharePoint solutions. We deliver innovative solutions to meet the most demanding requirements of our customers which include Times Top 1000 and Fortune 500 companies, as well as SME type organisations, based all over the world.

“Our business has been transformed into a more efficient productive unit which is wholly down to the skills and knowledge demonstrated by Technology Associates. They were able to provide a comprehensive Enterprise Project Management solution based around Microsoft Project that has meant that we now have real-time reporting, comprehensive cost roll-ups and full collaboration between our project teams. I wish we had done this years ago!”  
CEO  
Financial Services Company

We specialise in Microsoft Project, EPM, PPM and SharePoint consultancy, as well as custom development, systems integration and training by experienced

professionals. We also provide expert advice on custom designed, or third party applications and enterprise-wide solutions that extend the functionality of these Microsoft solutions. For more than nineteen years we have supplied some of the world's leading companies with best of breed business solutions based on Microsoft Office, Project, SharePoint and associated technologies.

Technology Associates International is a Microsoft Enterprise Project Premier Solution Provider and a Microsoft Gold Certified Partner which makes our company uniquely placed within the UK. We were the first UK company to have achieved the status of both Partner certifications. We are proud to have on our staff the world's first ever Microsoft Project MVP (Most Valued Professional – an award given for providing an

outstanding level of service and support to Microsoft Project users). Technology Associates was formed more than nineteen years ago with the firm philosophy of providing high quality project management solutions, training and support services to businesses around the globe.
